

# AR HARLEY

& SONS LTD

Manufacturer and Distributor of Performance and Custom Parts  
[www.harleycustom.com](http://www.harleycustom.com)

Volume One  
(first of many)

# Welcome

A R Harley & Sons operates from one of the most beautiful parts of England. The area has been lived in since Roman times and was the centre of iron and gunpowder manufacture for many centuries. The local church dates back to the 13th century. Bodiam Castle is one of two nearby castles. It was begun in 1385 by Sir Edward Dalyngrigge and its purpose was part fortress and part country house as his main residence was 50 miles to the west. There is a moat and various pools and the setting was elaborately landscaped. Tourists world-wide visit it in large numbers. The town of Battle is only 4 miles distant and is the historic site of the battle of Hastings in 1066 when the Duke of Normandy defeated the Saxon King Harold. A large abbey was built to commemorate the battle and still stands today. The English Channel is only 5 miles south and the channel tunnel at Folkstone is only one hour drive away.

This is our first catalogue and we are pleased to present a range of well designed and high quality parts for your motorcycle as well as parts for custom bike building. We aim to be helpful with any information you may need for planning your custom bike build, some of which is available by email request. You will also find pictures of some truly amazing custom bikes. Our exhaust systems are all made from 14 gauge tube and because of their quality they come with a 10 year guarantee. We are the only exhaust manufacturer worldwide who offers such confidence in the quality of their exhausts. We offer the widest range of

aluminium gas tanks available from a single source and are the first to offer new products from HPU and Penz Performance. See the first frames made for the Feuling W3 motor. All these parts can also be purchased online on [www.harleycustom.com](http://www.harleycustom.com)

I hope you enjoy the catalogue as much as I enjoyed putting it together.

*Alistair Harley*
